

## ZIP-IT Expedited Production

Zip-It is an expedited production program. There is no additional cost, and Zip-It production is available for many lanyard products. Identify which products offer this option by looking for the Zip-It logo.

Orders received after 9 a.m. mountain time will be processed the following business day.

All information, including print-ready vector artwork, must be provided at the time of your order, special requests, incomplete or missing information may cause a delay in processing.

### Maximum Quantities

If a company orders more than 2499 lanyards, standard production times will apply.

### Proof

You will not receive a paper or digital proof because of the shortened production schedule.

### Font Requests

If typesetting is requested (text only or text with logo), your font choices are limited to Arial Bold, Helvetica, or Times New Roman. If any other font is requested, your order will default to Arial Bold.

### Art Requirements

For one color and multi-color imprints (silk-screened lanyards), provide print-ready, vector art. For a one-color process, the art must be black and white. For multiple colors, call out the PMS colors for the selected ink colors. Exact PMS or CMYK color matches are not available.

Full color lanyards are printed using dye-sublimation; for best results, supply vector artwork and call out PMS -Solid Coated colors. Colors that are called out will be matched as close as possible. Art files submitted as bitmap, jpg, or files with gradients cannot be printed with PMS values.
